

MOZZARELLA (\$MOZZA)

\$MOZZA is an ERC-20 token born from the success of \$CHEDDA for the community which was created on the 8th of February 2022.

Rewarding holders in a true decentralised manner fairly and efficiently.

How safe is \$MOZZA?

- Contract is renounced, meaning no further changes can be made to it
- Locked Liquidity for 3 months
- Buybacks performed and all have been added to liquidity to help the community
- Audit in progress

Progress so far on \$MOZZA

- Listed on CoinGecko in the first 12h
- CoinMarketCap listing pending
- Almost 500 holders!
- Reaching \$7,000,000 Marketcap with \$2,500,000 daily volume in the first 24 hours
- 500+ active telegram members
- In the progress of expanding social media presence

Tokenomics for \$MOZZA

- Total supply of 1 Trillion
- 50% of tokens burned
- 10% Dev Fee with 1% distribution among holders
- Buybacks performed with added liquidity

Ecosystem Development & Mozza DAO

- To reward holders staking will be developed and the native token will be used as a voting tool for the DAO when passing important decisions in the development of \$MOZZA
- Staking will have multiple pools to pick from and attractive APR% rates
- This is to give more possibilities of a passive income for holders and to increase liquidity in the ecosystem.
- We want to listen to the community and decided this is the best approach to decentralisation.

Roadmap for the next month ahead

- \$MOZZA billboards
- Twitter Marketing Ramp up
 - Coinmarketcap listing
- \$10 Million marketcap and beyond
 - Whitepaper v2 launch
 - 1000 holders
 - Listed on exchanges
 - More community contests
